SunRail Schedule Change Coming Oct. 14

Sanford, Fla - SunRail is making some minor schedule changes effective Oct. 14, 2019 and the schedule may be viewed at www.sunrail.com. This update does not affect all trains and, in most instances, only moves the departure time from one to five minutes later. This minor adjustment will alleviate traffic congestion by reducing the instances in which trains traveling north and south arrive at the Longwood station at the same time, tying up traffic signals.

There is one change of 30 minutes, affecting one train – P338, which travels northbound in the evening. After conducting surveys with riders and meeting with major hospitals, it was concluded that this adjustment will create more opportunities for shift workers to take the train to and from work.

Current bus schedules are not affected by this change and other connections such as the Kissimmee Connector and Sanford Trolley will agree with the update as well.

Please be careful around trains, railroad crossings, and while at station platforms. Let's Go for Zero Distractions/Collisions/Trespassers.

For more information about SunRail, including fares, schedule and station locations, please visit www.sunrail.com or download the new SunRail app. And always remember to tap on and off at your embarkation station and final destination.
